

Painel Policristalino

Módulo Solar PV

144 Cells - 200W

The main features

Power and tolerance

0~+3W positive power tolerance guarantee

Resistance to the PID

Harsh conditions for 96 hours testing qualified (@ 85 °C / 85%). For special severity Installation environment, can meet higher standards

Stronger surface resistance to mechanical loads

It has passed the certification of 6000Pa snow load and 3600Pa wind load

High reliability and weather resistance

Through dust, salt fog, ammonia corrosion test, can effectively deal with the harsh environment

The hail test

It passed the hail test with a diameter of 45mm and a speed of 30.7m/s

Lower temperature coefficient

Better temperature coefficient makes the power attenuation less at high temperature

Best quality assurance

Linear power output warranty

Industry quality assurance

12 years of product material and process quality assurance
25 years linear power output warranty
